

Landlines Are Ancient. Upgrade to VoLTE.

Cut the copper lines and move to a reliable voice over LTE (VoLTE) solution from Northland.

Modern Solutions for Business Communications

Since 2020, the FCC has recognized the need for replacing outdated copper communications infrastructure. As a telecom service for more than a century, Northland's experts will bring your communications systems into the 21st century.

What's Legacy?

➤ Point-of-Sale (POS) Systems

Many POS operations run through a dedicated telephone line.

➤ Elevators, Alarms, Security

Hardwired connections to security systems, alarms, and elevators all run through physical telephone lines.

➤ Private Branch Exchanges

(PBX), fax machines, and meter readers are all examples of legacy systems that need to be replaced.

Ditch Copper Lines and Upgrade Today

Uncompromising Security

With multi-WAN connectivity, business continuity is assured even during network outages. Approved for life safety and compliant with NFPA 72, PCI, and HIPAA standards.

Modern Technology

Unlike analog copper landlines, VoLTE is a digital solution, offering superior call quality and additional features compared to traditional lines.

Always-On Reliability

VoLTE offers a robust and reliable connection that leverages existing cellular networks. No business disruptions. No hassle.
