

Never Lose Internet Connectivity Again.

Benefits of Cellular Wireless Failover

In the event of an unexpected internet outage, your wired network will seamlessly switch to a 4G LTE wireless backup, ensuring continuous operation of essential office equipment.

- **Business Continuity**
- **Configurable Automatic Failover**
- **Reliability, Flexibility, Security**

⌚ Seamless Setup

Northland's solution automatically switches to a secure cellular connection once it detects that your wired internet connection has failed.

⌚ Always-On Reliability

Cellular Failover is like a backup generator for your internet. It's a redundant system that works around the clock, ensuring you never miss a beat.

⌚ Uncompromised Security

Approved for life safety and compliant with NFPA 72, PCI, and HIPAA standards. This provides the same secure network you'd expect from Northland.
